

ACTIVITY
Stage 3 | Maths

You are a gold miner that has sent 65 ounces of gold to the Sydney Mint. Can you work out how many sovereigns you will likely get back?

- 1 ounce = 28.35 grams
- The Sydney Mint needs 8 grams of gold to make one sovereign coin
- One Sovereign is valued at £1

Remember – you will be charged 1% of the total value as a fee.

You can request that any amount that does not quite make up £1 as 'in silver'. When you think you the correct amount, fill in the Gold Escort receipt and sign it with your name and today's date.

Be careful – don't make a mistake with your hard earned gold!
